Graphics/Graphic Design-

EASYWORSHIP 7- displays lyrics on the screens.

WORD SWAG APP- Use this to make a graphic to share on social media of the song list before Sunday each week.

### **Communication to Team / Worship Planning**

PLANNING CENTER AND TEXTING

Planning Center keeps the song titles and keys organized and makes it easy to search and see when the song was used. Cost depends on the size of your group. There is a free version that I used for years. I love this because I can quickly look back at what songs and keys I have led songs in over the past 10 years.

### **Worship Software**

SONGSELECT

Songselect has many songs that you can search and download to use for worship. You can change the key and octave of the key. There are different songselect levels you can pay a subscription for. We use the full version so we can have access to lyrics, lead sheet and chord charts.

### **Gear / Software you use to enhance your worship**
